

Good morning!

Governor Beshear announced additional sites for vaccination. Six of the new locations are regional sites; three are federally qualified health centers; 10 are Walmart stores; 10 are Kroger stores; and 90 are Walgreens stores. New locations will be added to the 'Where Can I Get Vaccinated?' map on the vaccine.ky.gov website, also found [here](#).

As I mentioned, sites are added often so please do not hesitate to check information daily for your area. As I continue to learn of new opportunities I will pass them on as well.
Have a good day!
